

## ZenCap® PTFE Full Size Capsules

### 10"-40" Disposable Process Filtration

ZenCap® PTFE capsule filter assemblies are ready-to-use, full size filters that offer high flows, increased throughputs, high strength, all with the convenience and cleanliness of a disposable and easy-to-install filter assembly. Designed for pre-filtration, clarification, and final filtration of medium to large scale batches (100L to 5000L), in pharmaceutical, biotechnology, food and beverage, chemical, DI water and venting applications.

ZenCap® PTFE capsule assemblies are available with a range of hydrophobic filter pore sizes for liquid, gas, and venting applications. Process engineers can choose from 7 filtration pore sizes to suit the needs of the application. These will allow the disposable processing to become truly flexible, clean, and optimal.

They can be built in a T-style or In-line configuration with 12 inlet and outlet fitting connections that can be mixed and matched. The filtration shell is an all-polypropylene construction that provides excellent chemical compatibility with low extractables. The shell and supports can also be constructed in nylon or polyethylene for additional compatibility. No adhesives, binders, or surfactants are used in the manufacturing process.
